Projects

Subscription and Membership Purchase | go4WorldBusiness.com

- 1) Test Case Creation and Execution: Developed comprehensive test cases and test scenarios and Ensured that test cases were exhaustive, addressing each step from user login to payment confirmation or Failed payment.
- 2) Database Testing: Conducted rigorous testing of the database to validate the accuracy of information post purchase and Verified successful and failed payment scenarios, confirming the correct recording of amount, member ID, tax details, date, discounts, and other relevant data. Utilized SQL to extract information and Updated multiple tables with correct product pricing, plan names, and other relevant details, ensuring data integrity.
- 3) End-to-End Flow Testing: Executed end-to-end testing of the entire user journey, from login to redirection to the third- party payment gateway (Stripe).
- 4) Invoice Generation and Email Notification: Checked the generation of accurate invoices after successful transactions and Verified the automated sending of email notifications to users, both in the case of failed and successful payments.
- 5) Collaboration and Communication: Worked in Agile by collaborated closely with development teams to identify and resolve any issues promptly.
- 6) Documentation: Documented all test results, including successful and failed scenarios, providing a comprehensive reference for future analysis.
